INTENDED AUDIENCE:
This conference is intended for primary care physicians, psychiatrists, psychologists, physician assistants, nurses, pharmacists, medical students, residents, LCSW/LEPC/IAODAPCA, teachers, and other behavioral health professionals.

PROGRAM NEED
Psychiatric disorders represent up to 40 percent of disorders seen in Primary Care. Many of those disorders go undiagnosed, under diagnosed, or under treated. This educational activity is designed to provide strategies for monitoring and treating psychiatric patients. It will provide knowledge in terms of appropriate use of diagnostic and treatment tools available to them. As a regional resource for medical care and education, Rockford Health System assists in serving the educational needs of 17 hospitals, multiple clinics and physician offices, as well as over 500 practicing physicians. Our physician participants come from the metropolitan Rockford area, as well as underserved rural and inner city locations.

PROGRAM DESCRIPTION
This conference is designed especially for physicians who are interested in the most cutting edge treatments and medications for psychiatric disorders. Nurses, social workers, teachers, and other clinical staff are also invited to attend. Psychiatric Services Department at Rockford Health System, in collaboration with Rosecrance Health Network, the Rockford Health Council, and the Illinois Center for Excellence for Behavioral Health and Justice will host experts who will give presentations on a wide range of disorders.

LEARNING OBJECTIVES
1. Compare and contrast roles of the forensic psychiatrist and of the independent examiner in the medicolegal context.
2. Recognize the presentation, diagnosis and current treatment options for patients with Attention Deficit Hyperactivity Disorder.
3. Evaluate the psychiatric stressors from disasters and the need for a community response.
4. Describe the interface between the court and the mental health system in our community.
5. Assess autism spectrum disorders, possible causes and differential diagnosis.
6. Discuss strategies for determining an approach to manage patients with schizophrenia.
